

## About ITTS:

The Infant-Toddler Therapy Services Program team provides therapy and education to children birth to three years of age who demonstrate a developmental delay or disability. Our home-based therapies are designed to strengthen the relationship with parent and child and to provide opportunities for parents to learn how to incorporate it into their daily routines.

Therapy frequency is dependent upon the child's needs and is held in the child's natural environment. This includes, the child's home, daycare, babysitter's, relative's and even in the community at the library or playground.

All ITTS Program staff are employees of Community Care Connections, Inc., have extensive pediatric experience and are licensed and/or credentialed to provide service in Pennsylvania.

Let us help your child develop to their fullest potential.

## Our Therapies:

### ***Physical Therapy***

Our Physical Therapists will assist your child to develop strength, endurance, mobility, flexibility, balance, and coordination. They can assess the need for bracing, positioning equipment and walking aids. They specialize in movement, posture and gait analysis, helping your child become more independently mobile.

Our Physical Therapists will provide you with exercises and techniques that are specific for your child and will teach you how to use them in everyday activities.

### ***Special Instruction***

Our Developmentalists will focus on your child's overall development. They specialize in helping your child in his/her natural surroundings and everyday routines. They address your child's social and emotional development including attention to task, following directions, and interacting positively with others. They work to improve cognitive skills through therapeutic play. They provide information to increase the awareness of important developmental milestones.

### ***Occupational Therapy***

Our Occupational Therapists will assist your child in learning and improving fine motor skills in order for him/her to draw, play with blocks and other toys, manipulate puzzles and feed/dress own self. They provide assistance during mealtimes to coordinate utensil use and drinking skills, as well as to help improve tolerance for and ability to eat different types and textures of foods. They use sensory integration techniques to help children who have difficulty with the sensations of touch, movement, sight, sound, taste and smell.

Our Occupational Therapists have the ability to recommend splints or other adaptive equipment that might help your child become more independent.

### ***Speech Therapy***

Our licensed Speech Pathologists will help your child develop the skills and knowledge to communicate with family members and peers. They will assist your child in developing sounds, learn words and increase understanding of language through therapy and play. They can incorporate sign language and the use of pictures into your program as appropriate.

Our Speech Pathologists are trained to assess and treat oral motor function related to speech and feeding.

### ***Nutrition***

Our registered Dietitian will help you and your child with nutrition or feeding concerns. She may address weight gain or loss, tube feedings, or issues related to a disease or diagnosis such as Diabetes or Cystic Fibrosis, etc.

Our Dietician will educate your family about possible solutions to your child's nutrition-related issues as well as monitor the child's nutritional status.

### ***Family Testimonials***

*The Infant-Toddler Therapy Service Program has been wonderful for my husband and myself because the therapists are always giving us wonderful suggestions so we are able to continue the therapy throughout the week.*

*The therapists are truly amazing and we have no idea what we would do without their guidance.*

*Not only have we received therapy for our child, but we have met such wonderful people and made many friendships.*

*We are happy to have such a wonderful Physical Therapist! She demonstrates direct teaching with guided practice and problem solves well. She is kind, patient and very involved. We are so thankful for her!*
